Speaker : Dr. Craig Allen Miller

(Assistant Professor, Warnell School of Forestry and Natural Resources, University of Georgia, USA)

◆ Title ◆

"Assessing Social Conflict in Managing Nuisance Urban Raccoons in Chicago, Illinois, USA."

◆ Abstract ◆

Raccoons are considered one of the most numerous wildlife species in the urban and suburban environments in the United States. Many homeowners report problems with nuisance raccoons and wildlife managers have limited options in addressing these complaints.

This study examines homeowners perceptions of raccoons in the Greater Chicago Metropolitan Region of Chicago, Illinois, USA, and preferences for management actions that include lethal control.

Homeowner attitudes and preferences are based on beliefs and values regarding wildlife and animals in general, and this presentation will address potential conflict related to management of nuisance raccoons as well as possible actions managers can take to reduce conflict.
